

Honduras1 Summary Report

27/05/2026

Survey Summary

Data Collection Dates: : 2026-01-08 - 2026-01-19

Form	N
Indicators Form	40
Womens Form	40
Completed both forms	40
Completed only indicator form	0
Completed only womens form	0

Sample Demographics

Characteristic	N = 40 ¹
loc1_name	
Lange	40 (100%)
Respondent Sex	
F	34 (85%)
M	6 (15%)
Respondent Age	49 (33, 56)
Women's Form Respondent Age	50 (32, 57)
Education (Household Head)	
No school	1 (2.5%)
Primary	30 (75%)
Secondary	8 (20%)
Post-Secondary	0 (0%)
Adult education, literacy school or parish school	0 (0%)
No answer	1 (2.5%)
¹ n (%); Median (Q1, Q3)	

Indicator Summary

Indicator	Estimate
PO.1	
Total Number of Crops (Median)	3
Total Number of Important Crops (Median)	2
Gini-Simpson Diversity Index (Median)	0.07
Median % of farm area used for staple crop production (Millet, Maize, Sorghum & Wheat)	77.0%
PO.2	

Indicator	Estimate
Women's Decision Making - Crops grown for food	76.9%
Women's Decision Making - Crops grown for the market	83.8%
Women's Decision Making - Expenditure of household savings	77.5%
Women's Decision Making - Choose how to spend their own income	82.5%
Women's Decision Making - Choose what to sell in the market	68.4%
Women's Decision Making - Participate in community committees – specifically can they choose how they allocate time to community groups, farm work, etc.	85.0%
% of women having sole/joint ownership of at least one major or two minor assets:	100.0%
Median % of household assets owned solely/jointly by women	100.0%
PO.3	
% of households with at least 2 different sources of income	40.0%
Financial situation - “We can buy everything we want and there is still money for potential savings”	67.5%
Does your household have any credit, debts or loans, or did you have any in the last 12 months?:	30.0%
Did you ever find it difficult to pay the debts in the last 12 months	20.0%
PO.4	
Minimum Dietary Diversity (5 food groups)	100.0%
Estimated % of households with moderate or severe food insecurity:	54.1%
Estimated % of households with severe food insecurity:	2.9%

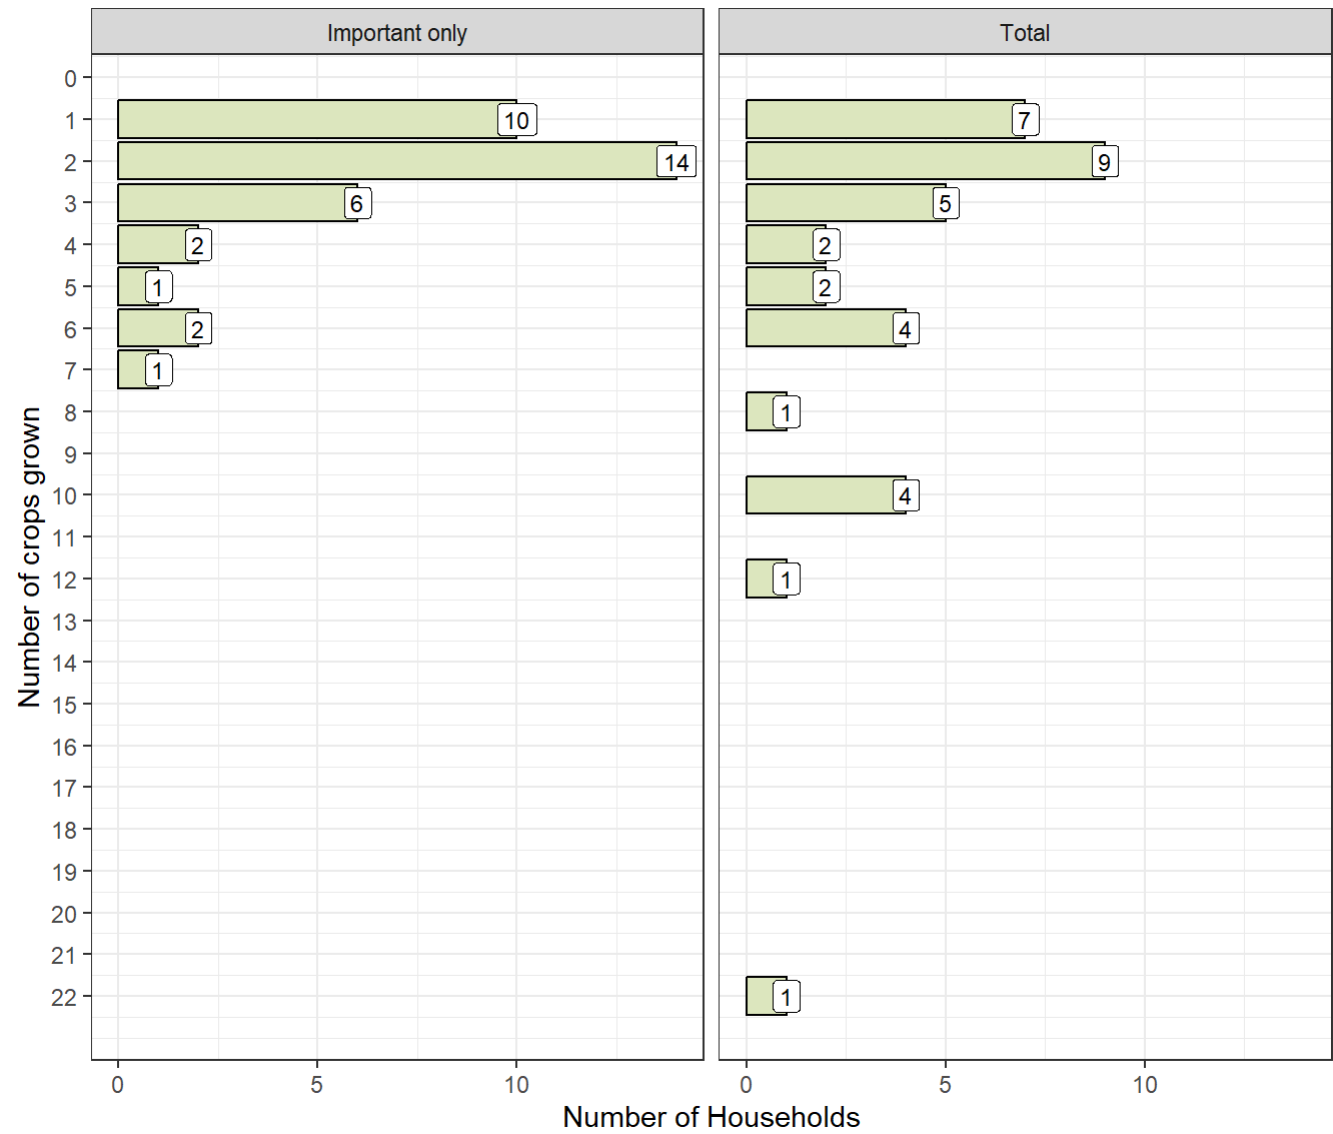

PO.1 Productivity

Objective Definition : Smallholder farm households have improved their capacity to increase productivity and food security by transitioning their farming systems through agroecological methods.

Crop Production

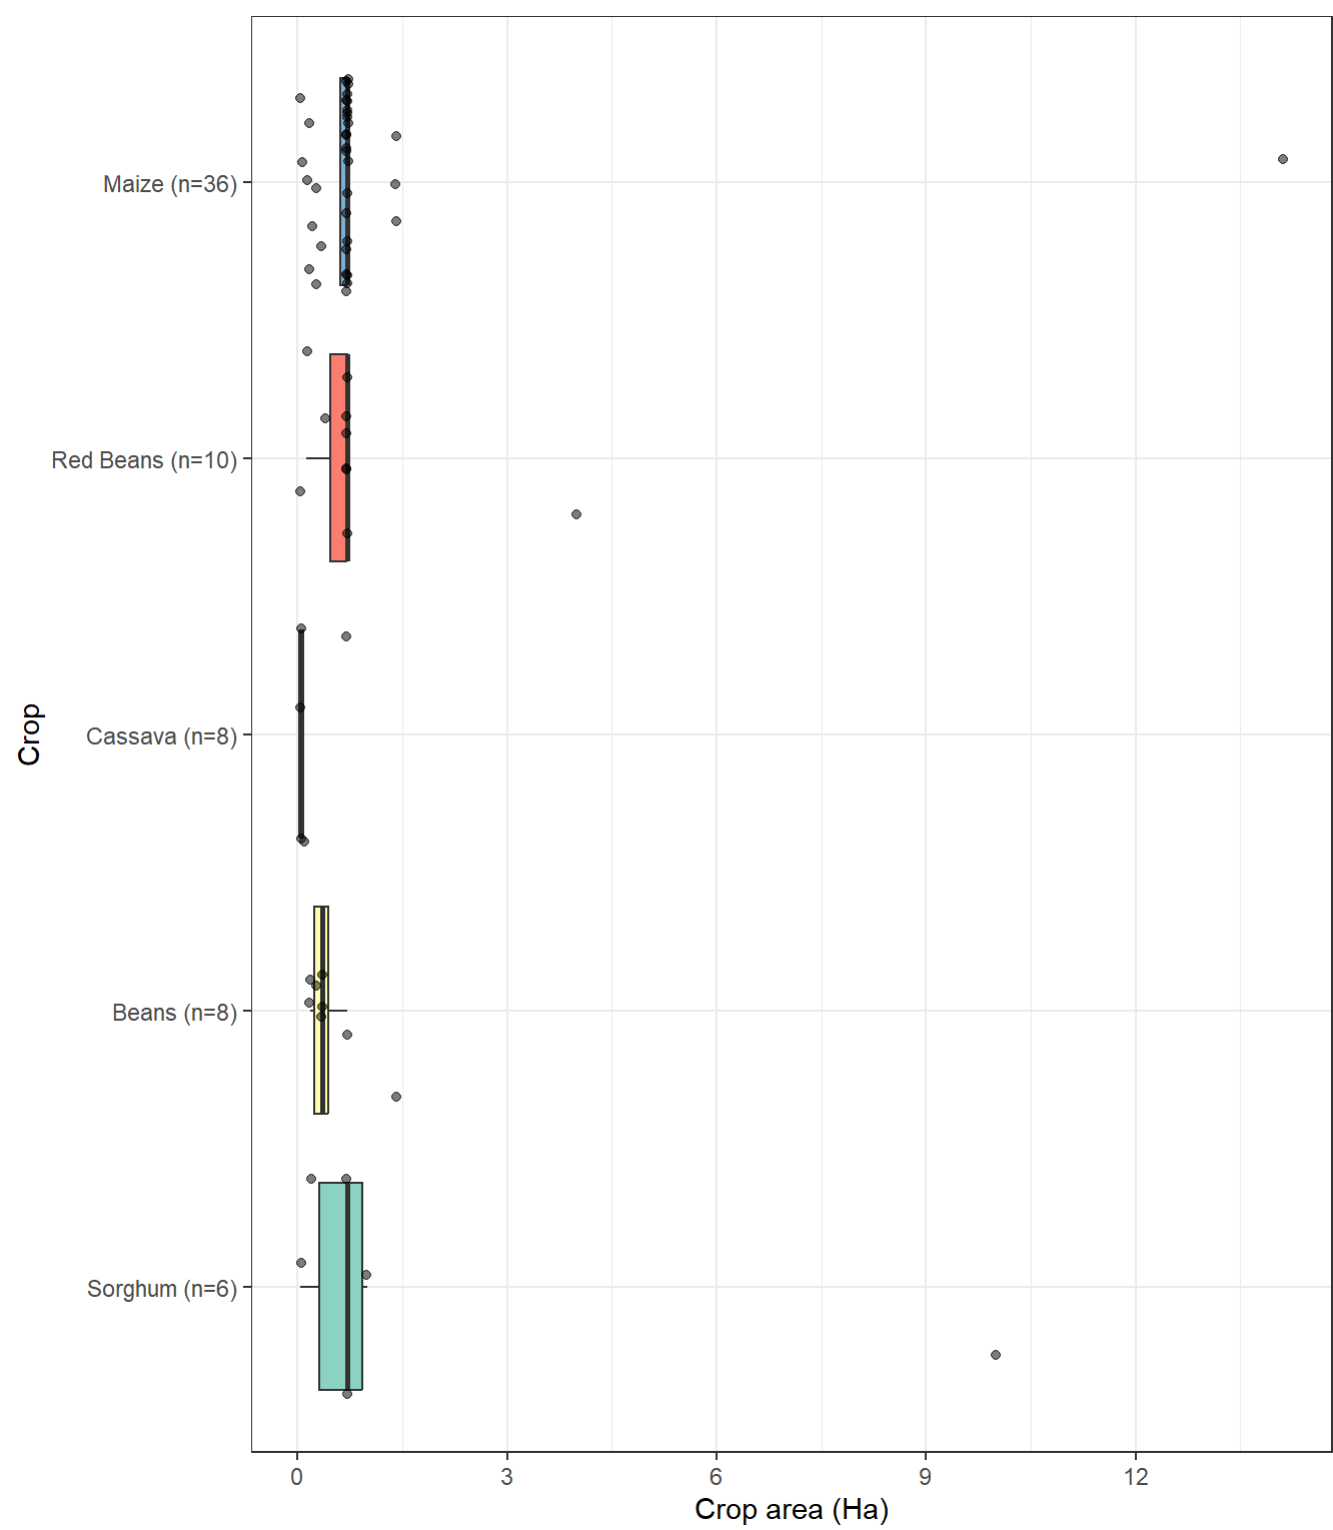

Crop	N (%)	Mean Area (Ha)	Mean Yield (Kg)	Mean Productivity (Kg/Ha)
Maize	36 (90.0%)	1.01	5,808	8,650
Red Beans	10 (25.0%)	0.88	1,049	1,699
Cassava	8 (20.0%)	0.18	537	3,856
Beans	8 (20.0%)	0.47	2,993	4,625
Sorghum	6 (15.0%)	2.10	484	1,630
Squash	4 (10.0%)	0.04	60	1,371
Bananas	3 (7.5%)	0.22		
Sweet Potato	2 (5.0%)	0.02	7	13,605
Kidney Beans	2 (5.0%)	0.71	499	708
Nance Fruit	2 (5.0%)	0.04	27	622
Chilli Peppers	1 (2.5%)			
Orange Trees	1 (2.5%)	0.04	91	2,075
Pineapple	1 (2.5%)	0.17	4,000	22,857
Mango	1 (2.5%)	0.09	908	10,377
Coconut	1 (2.5%)	0.04	40	914
Sweet Chili	1 (2.5%)			
Chipilín	1 (2.5%)	0.09		
Missing entries result of using measurment units wihtout confrimed coversions to KG and/or HA				

Number of crops grown in a farm

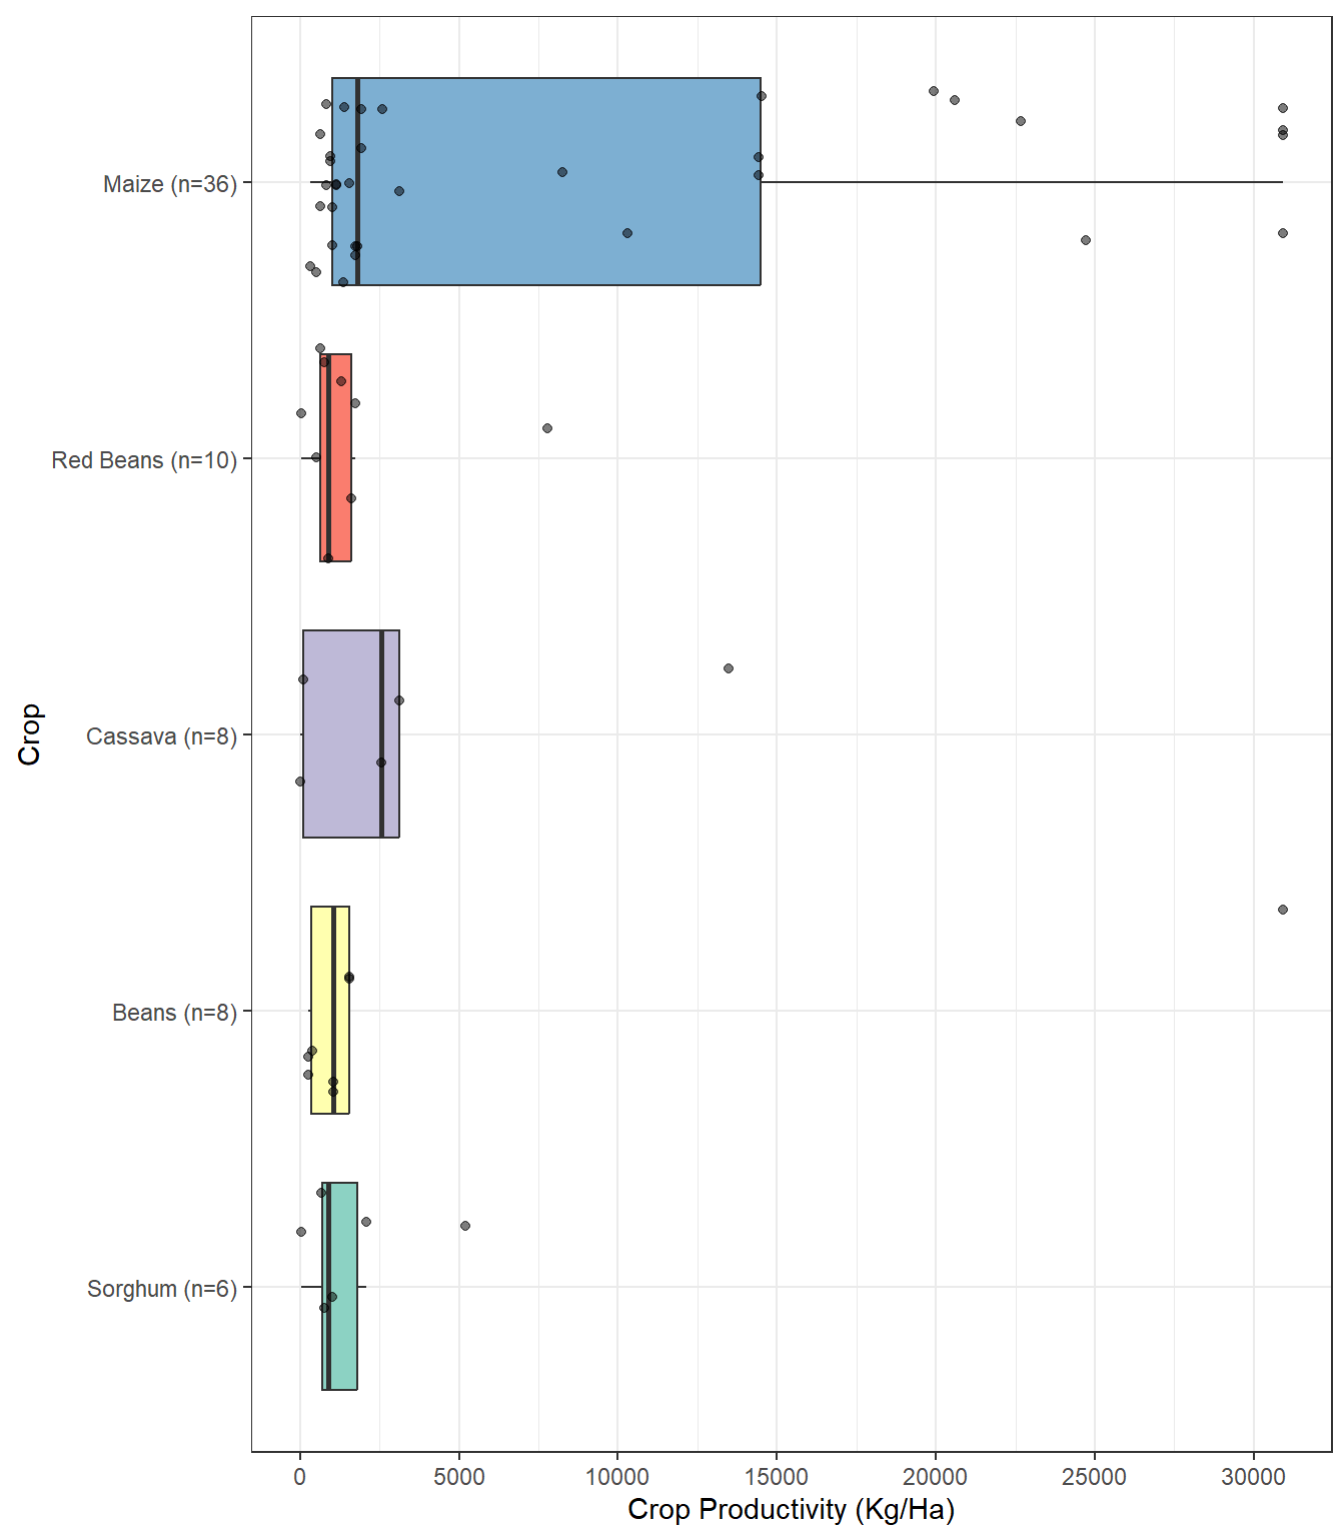

Area of main crops (Ha)

The following box plot shows the distribution of crop production areas (in hectares) for all crops grown by at least 5 respondents. The box represents the interquartile range (IQR) of the data, with the line inside the box indicating the median. The whiskers extend to 1.5 times the IQR, and any points beyond this range are considered outliers and are not shown in this plot.

Crop Yields (Kg/Ha)

The following box plot shows the distribution of crop yields (in Kg/Ha) for all crops grown by at least 5 respondents. The box represents the interquartile range (IQR) of the data, with the line inside the box indicating the median. The whiskers extend to 1.5 times the IQR, and any points beyond this range are considered outliers and are not shown in this plot.

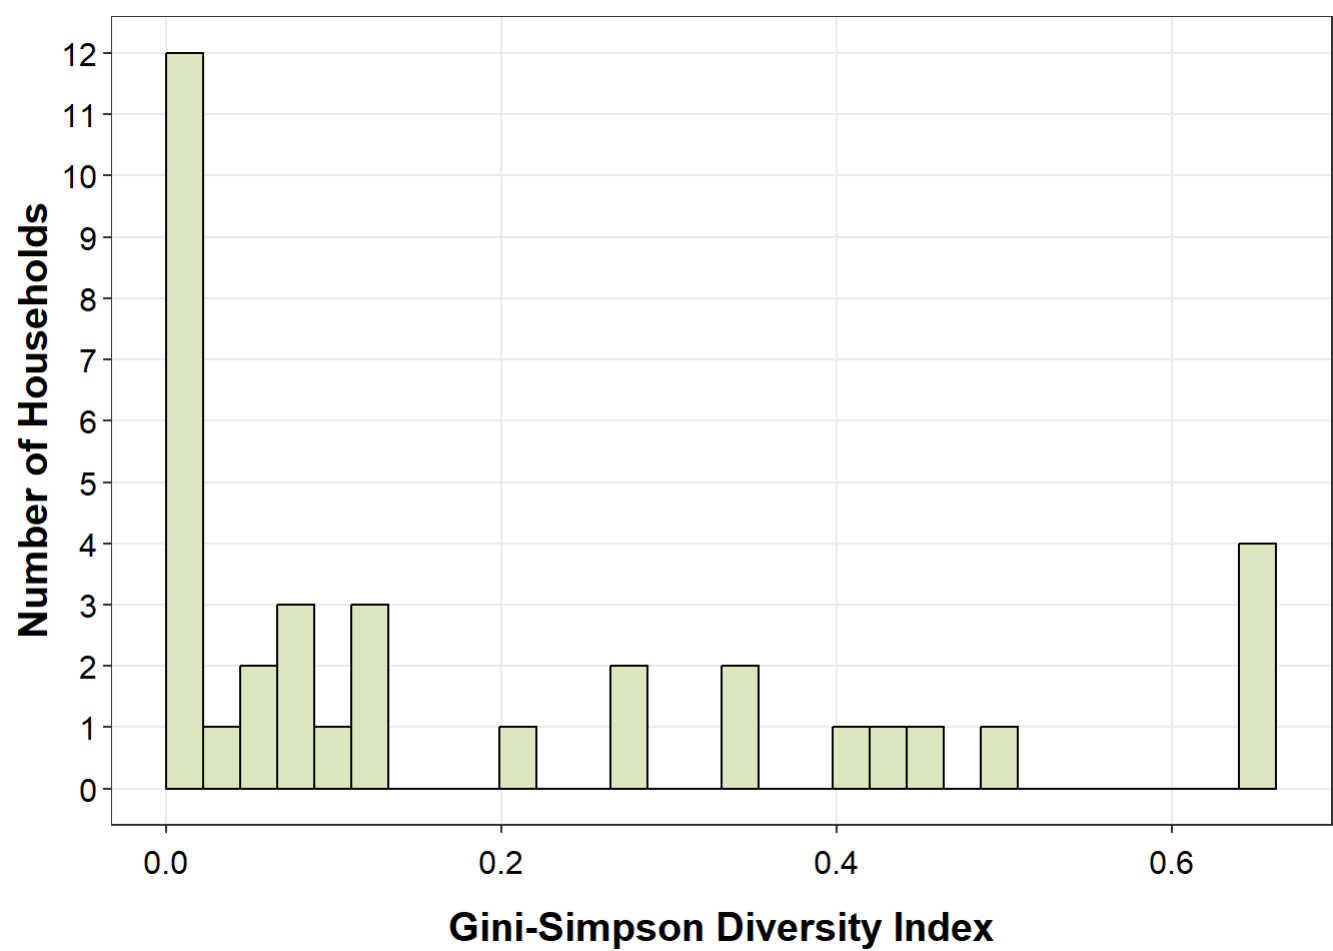

Crop Diversity

The Gini-Simpson Diversity Index measures the probability that two randomly selected individuals from a population belong to different groups or categories. For the purposes of this implementation, this index is instead calculated using the yields of each crop listed as important (as we do not have detailed production information on the other harvested crops). Therefore scores may be considered an underestimate of the total farming system.

A higher score indicators a higher level of diversity in a farm’s crop production, while a score of 0 indicates a monoculture farming operation.

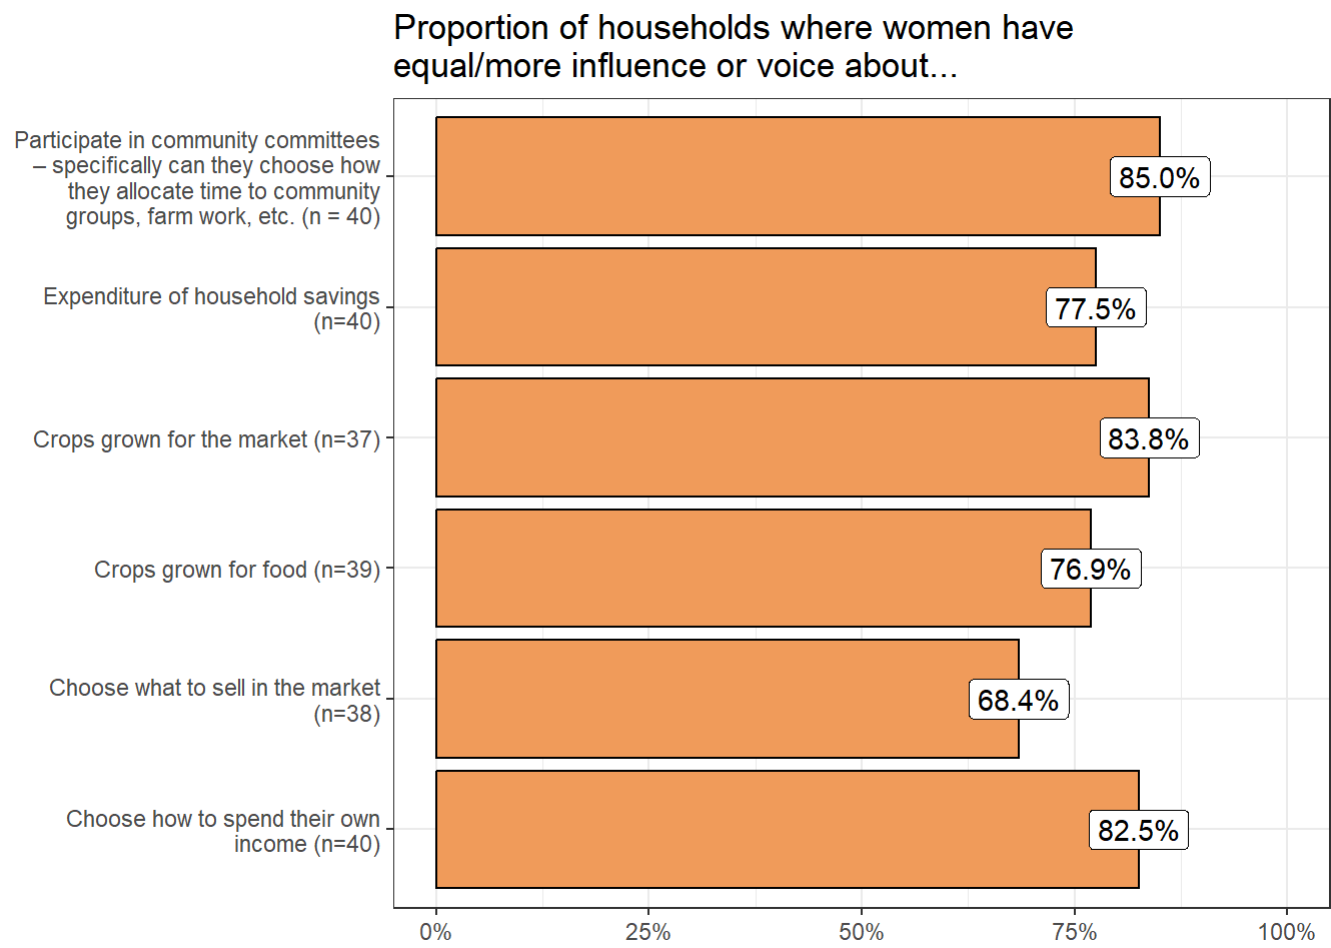

Characteristic	N = 40
Gini-Simpson Diversity Index	
Mean (SD)	0.19 (0.23)
Median (Q1, Q3)	0.07 (0.00, 0.34)
Min, Max	0.00, 0.66
Unknown	5

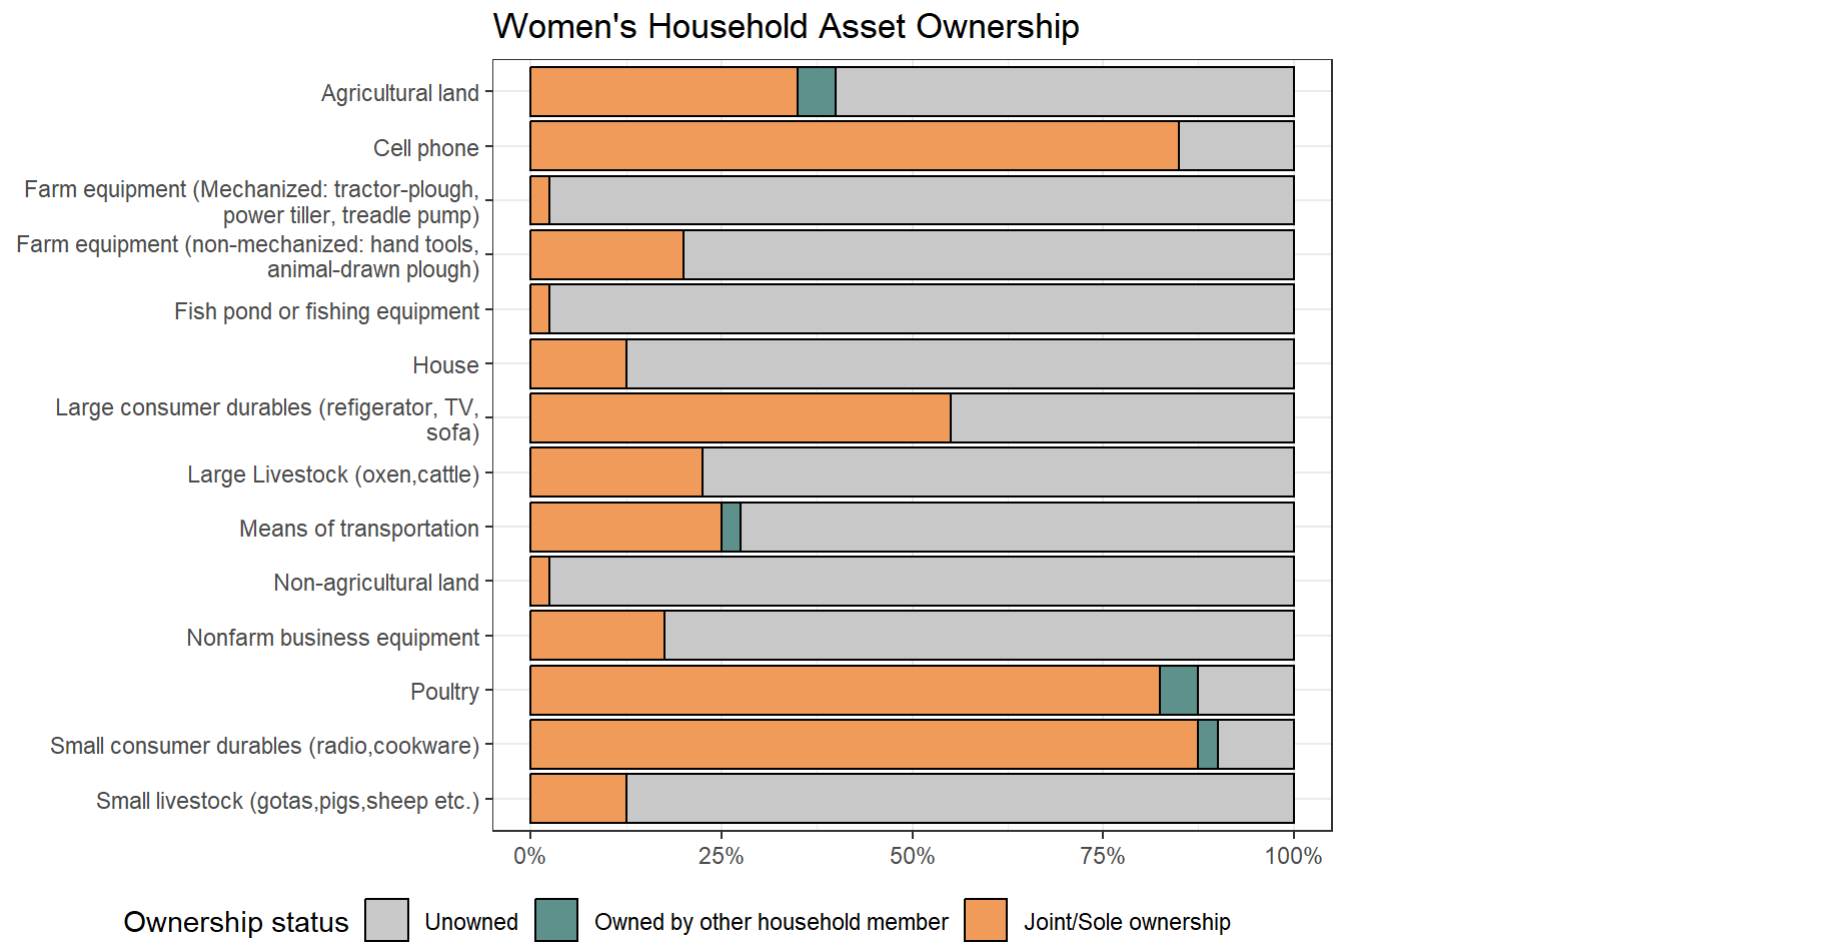

PO.2 Womens Empowerment

Objective Definition : Women farmers have gained greater control over productive resources and decision making in their households and communities.

Proportion of households where women have equal/more influence or voice about...

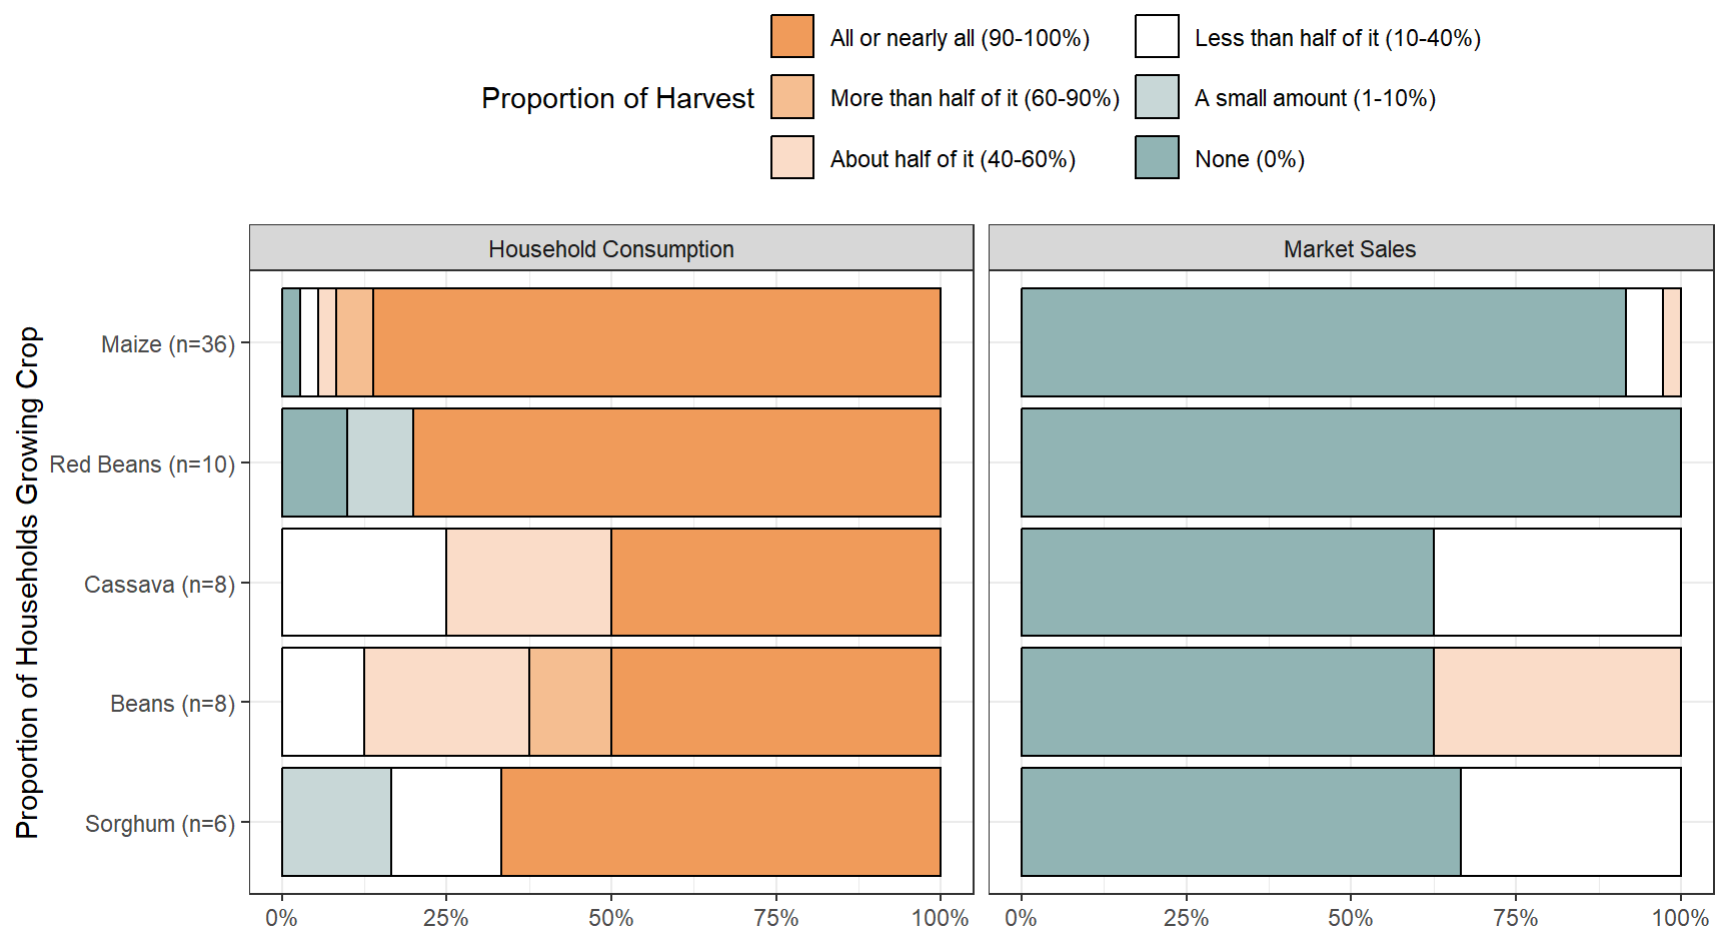

Asset	Joint/Sole ownership	Unowned	Owned by other household member
Agricultural land	35.0%	60.0%	5.0%
Large Livestock (oxen,cattle)	22.5%	77.5%	0.0%
Small livestock (gotas,pigs,sheep etc.)	12.5%	87.5%	0.0%
Poultry	82.5%	12.5%	5.0%
Fish pond or fishing equipment	2.5%	97.5%	0.0%
Farm equipment (non-mechanized: hand tools, animal-drawn plough)	20.0%	80.0%	0.0%
Farm equipment (Mechanized: tractor-plough, power tiller, treadle pump)	2.5%	97.5%	0.0%
Nonfarm business equipment	17.5%	82.5%	0.0%
House	12.5%	87.5%	0.0%
Large consumer durables (refrigerator, TV, sofa)	55.0%	45.0%	0.0%
Small consumer durables (radio,cookware)	87.5%	10.0%	2.5%
Cell phone	85.0%	15.0%	0.0%
Non-agricultural land	2.5%	97.5%	0.0%
Means of transportation	25.0%	72.5%	2.5%

PO.3 Household Income

Objective Definition : Smallholder farm households have sustainably increased their incomes and diversified their livelihoods with an emphasis on local markets.

Markets

	Beans N = 8 ¹	Cassava N = 8 ¹	Maize N = 36 ¹	Red Beans N = 10 ¹	Sorghum N = 6 ¹
Household Consumption					
All or nearly all (90-100%)	4 (50%)	4 (50%)	31 (86%)	8 (80%)	4 (67%)
More than half of it (60-90%)	1 (13%)	0 (0%)	2 (5.6%)	0 (0%)	0 (0%)

Income Diversification

Diversity & Importance of Income Sources

Characteristic	N = 40 ¹
Income Source	
Crop farming + Off-farm sources	16 (40%)
Crop farming only	20 (50%)
Income sources unreported	2 (5.0%)
Off-farm sources only	2 (5.0%)
¹ n (%)	

Income Source	Households (n)	%
Labour on other farms	2	5.0%
Labour, not on a farm	2	5.0%
Have own business	4	10.0%
Remittances (send money)	10	25.0%
Other	1	2.5%

Ability to Save & Pay Debts

Households reporting their financial situation as “We can buy everything we want and there is still money for potential savings”: 67.5%

Does your household have any credit, debts or loans, or did you have any in the last 12 months?: 30.0%

Did you ever find it difficult to pay the debts in the last 12 months: 20.0%

Self-Perception of Financial Situation

	N = 40 ¹
Self-Perception of financial situation	
We can buy everything we want and there is still money for potential savings	27 (68%)
We can buy everything we want without specific problems but we are not able to save	0 (0%)
We live economically and so we can afford everything	10 (25%)
We live very economically in order to save money for important purchases / events	3 (7.5%)
We can buy only the cheapest food clothes and rent the cheapest apartment and (if the household is in debt) - for loan repayment	0 (0%)
We can only buy the cheapest food and we have no money to repay the loan or to pay for new clothes or rent	0 (0%)
We can not afford even the cheapest food	0 (0%)
¹ n (%)	

PO.4 Food Security & Dietary Diversity

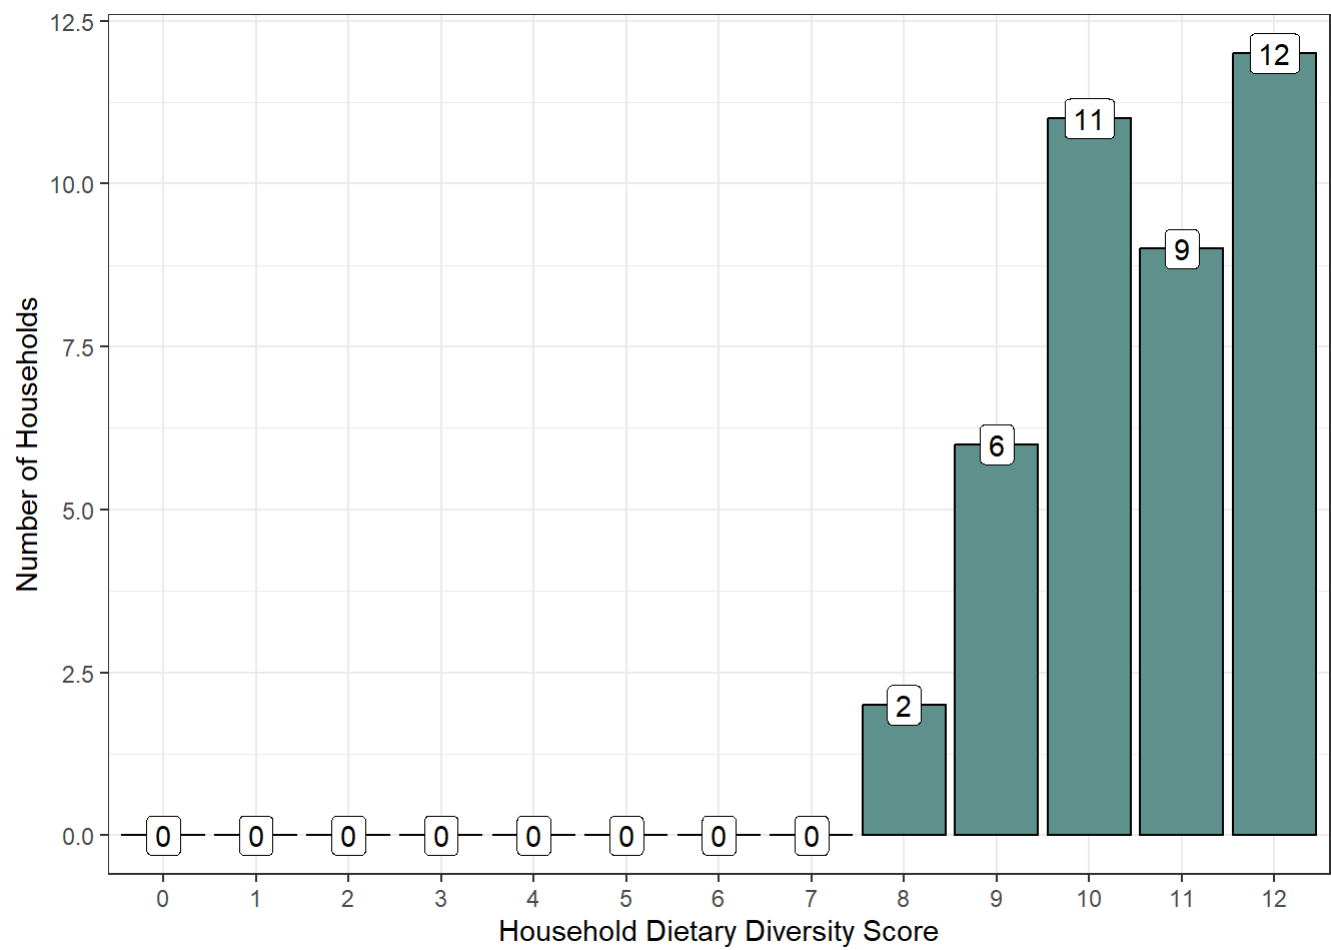

Objective Definition : Vulnerable households have improved dietary diversity and nutritional status.

Household Dietary Diversity

Household dietary diversity is defined by asking the respondent which of the following 12 food groups did they consume within the last 24 hours including; grains, roots & tubers, pulses, vegetables, fruits, meat & poultry, eggs, fish & seafood, milk & dairy, oils & fats, packaged sweets or honey and miscellaneous others. Scores will range between 0 and 12. A score of 0 would reflect a household going a whole day without eating, a score of 12 suggests every listed food group was consumed within the household.

Note: During the pilot phase of groundswell, these questions only included the responding woman of the household in the wording. Future implementations will reflect the whole household.

% Households Reached minimum level of diversity (at least 5 food groups): 100.0%

FIES (Food Insecurity)

The Food Insecurity Experience Scale (FIES) assesses a households recent history of food security through 8 questions. For each question, the responding woman will answer whether or not the household exhibited certain events due to a lack of money or resources over the last 12 months. These include being unable to east healthy foods, skipping meals, and going a whole day without eating.

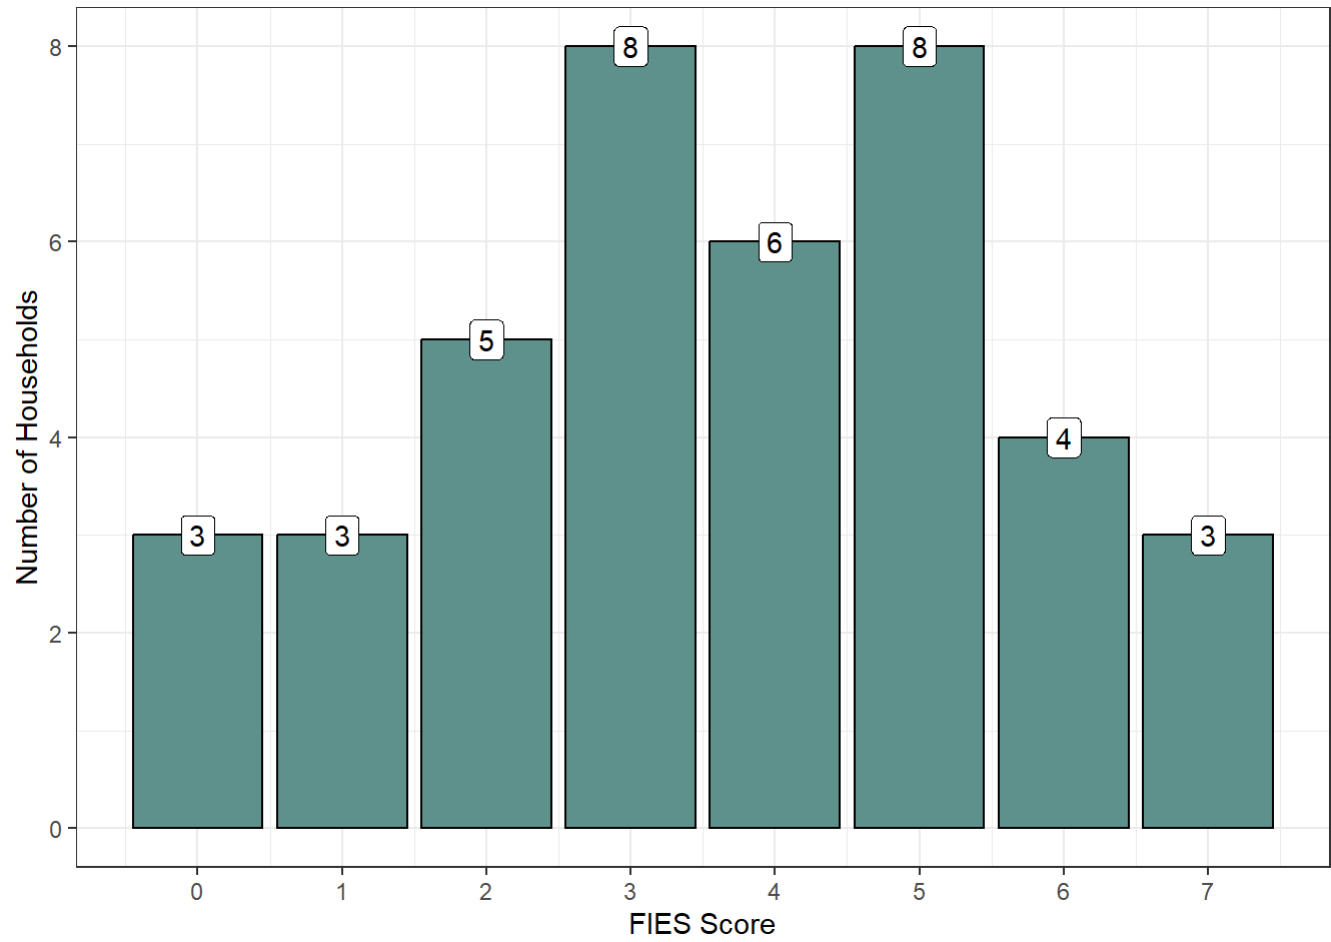

Each behaviour experienced increases the FIES score by 1, therefore lower scores represent greater food security while high scores reflect high insecurity. Households may additional be categorised based on which specific events they experienced.

- Food Secure = No food insecure events experienced
- Mildly Insecure = Experienced worrying about not having enough to eat, being unable to eat healthy food, eating only a few kinds of foods or skipping a meal
- Moderately Insecure = Experienced eating less than they thought they should, running out of food or were hungry but not eat.
- Severely Insecure = Experienced going a whole day without eating

Estimated % of households with moderate or severe food insecurity: 54.1%

Estimated % of households with severe food insecurity: 2.9%

FIES Category	n	%
Food Secure	3	7.5%
Mildly Food Insecure	16	40.0%
Moderately Food Insecure	20	50.0%
Severely Food Insecure	1	2.5%

Think back over the last YEAR. Was there a time when, because of lack of money or other resources...
